

Enida Vezelaj

Software Engineer | NY

[Email](#) | [LinkedIn](#) | [Github](#) | [Website](#)

TECHNICAL SKILLS

Strong: JavaScript(ES6), HTML/CSS, React.js, Redux, React Native, Express.js, Axios, REST API, Node.js, Express.js, Sequelize.js, PostgreSQL, Git, JSON

Experienced: Firebase, Firestore, ViroReact, SQL, Socket.io, Webpack, Babel, Testing/TDD

PROJECTS

Matchingev-one, npm Module (Sole Development)

- Developed matching algorithm based on the stable marriage problem in which, given two sets of elements and their preference for each other, will be matched into pairs based on preferential treatment.
- Published to npm website where other developers can download to use for their project

Technologies used: Node.js, JavaScript

Gelato Finder, Mobile App (Sole Development), [Github](#)

- Built components from backend to frontend including
- Implemented authentication system to securely store credentials for users using Firestore Auth
- Set up a Tab navigation for three screens: map, profile and saved places.
- Added simple styling and customised pointers on the map.

Technologies used: Javascript, React Native and Firestore

Grace In Space, Mobile VR Game (Team Development), [Github](#)

- Set up initial stack and redux store and worked on navigating between different technologies, created components, modified existing ones and resolved general issues with navigation, handing and managing memory leaks on the VR component.
- **Technologies used:** Javascript, React Native, React/Redux, ViroReact, Firebase, Schetchup

Cupcake Store, Web App @ [Website](#) (Team Development), [Github](#)

- Planned the schema for database models
- Set up routes to fetch data and created secure REST APIs
- Built cart component and cupcake presentation and set up routes for both guests and logged in users
- Used the browser session feature to momentarily store guest user order before purchasing
- **Technologies used:** Javascript, React/Redux, Express.js, Node.js, Sequelize, PostgreSQL

ADDITIONAL WORK EXPERIENCE

Tastemaker Music, INC (september 2019, present), Data Center Intern

- Racked and stacked network and server hardware at Data Center Colocation, installing Cisco ISR 4331 Routers, UCS MSC series servers, 6332 Fabric Interconnect and Nexus 9372 switches
- Arranged equipment so that intake was facing cold aisle and exhaust was facing hot aisle
- Labeled and cabled Cat6 and Ethernet and multimode Fiber, situating and tying to prevent blockage of device airflow

EDUCATION

Fullstack Academy of Code, NY 2019 Software Development

New York Institute of Technology, NY 2012 Architecture
