

Enida Vezelaj

Software Engineer | NY

enida.vezelaj@gmail.com | <http://www.linkedin.com/in/enida-vezelaj> | <https://github.com/Emis90>

TECHNICAL SKILLS

JavaScript(ES6+), HTML, CSS, React.js, React Native, Redux, Node.js, Express.js, Sequelize.js, RESTFUL APIs, JSON,, PostgreSQL, GraphQL, Apollo, Git, Python, Firebase/Firestore, Socket.io, ViroReact (Virtual/Augmented Reality), Webpack, Babel,

WORK EXPERIENCE

myErrunds, INC Fullstack Engineer (errundsonline.com) February 2020 - present

I joined a team of Developers in the designing and developing of two mobile applications using React, Redux and Apollo. Implemented different libraries based on the requirements provided by the designers and Helped the Tech-Lead on the back-end to create endpoints and retrieve the necessary data.

PROJECTS

Museums of NYC, Real Estate Web App @ [Website](#) , [Github](#)

- Fully developed a real estate website of Nyc museums, data was fetched from a public museum api and used to seed my Postgres database.
- Set up multiple routes to allow the user a preferential based look-up.
- Used React on frontend and kept all components displaying at the same time to allow dynamic change of data on both map and list.

Technologies used: Node.js, React.js

Matchingev-one, npm Module

- Developed a matching algorithm based on the stable marriage problem in which, given two sets of elements and their preference for each other, will be matched into pairs based on preferential treatment.

Technologies used: Node.js, npm

Grace In Space, Mobile VR Game, [Github](#)

- Set up initial stack and redux store for better state management.
- Worked on navigating between static React and virtual Viro components and resolved general issues with memory leakage.
- Implemented user authentication with Firebase and added Firestore as database to keep scores.

Technologies used: React Native, Viro, Firebase/Firestore

Cupcake Store, Web App @ [Website](#), [Github](#)

- Planned the schema for database models
- Set up routes to fetch data and created secure REST APIs
- Built cart component and cupcake presentation and set up routes for both guests and logged in users
- Used the browser session feature to momentarily store guest user order before purchasing

Technologies used: Node.js, PostgreSQL, React.js, Redux

Gelato Finder, Mobile App, [Github](#)

- Built components from backend to frontend
- Implemented authentication system to securely store credentials for users using Firestore Auth
- Set up a Tab navigation for three screens: map, profile and saved places.
- Added simple styling and customised pointers on the map.

Technologies used: Javascript, React Native and Firestore

EDUCATION

Fullstack Academy of Code, NY 2019 Software Development

New York Institute of Technology, NY 2012 Architecture
